

We've reached episode number 7.

I thought of this as a perfect introduction to complete PDF reports with photos and details.

A large and important dealership calls Luca and entrusts him with the task of inspecting cars and providing him with the details of each one.

Luca uses Autobit not only to note every detail, but also to take photos and bring him the complete PDF files,

so that the dealer can inspect them and, thanks to all the details, choose which ones to buy for his showroom. What do you think?

It's a perfect evolution of the series.

And above all:

it comes at the right time.

Because until now, Autobit has been perceived as:

analysis support

smart checklist

reminder

organization of checks

Now, let's make the app take the leap:

a complete professional tool.

And it's VERY IMPORTANT that this happens through:
a large dealership.

Because it completely changes Luca's perception.

He's no longer just:

"the guy who helps private individuals."

Now:

professionals are starting to truly trust his method.

And this is a huge narrative shift.

Furthermore:

this episode greatly expands the Autobit world.

Because we finally enter:

the professional sector

in real flows

in stock management

in vehicle selection

in serious commercial evaluation

And it's very credible.

Then there's something very clever:
Luca does NOT choose the cars.

Luca:
documents.

Which is perfect for the character.

Because he maintains his role:
analyst.

Not trader.

And this distinction is fundamental.

THE MOST STRONG THING

The PDF.

Because:
here Autobit stops being just:
"app to use on the spot."

And becomes:
a real work tool.

So:

photos
notes
anomalies
condition of wear
aesthetic details
checklist
history
appraisals

everything organized in:
professional reports.

And this can be visually beautiful.

PERFECT ATMOSPHERE

In my opinion, this episode must have:

huge dealership
rows of cars
cold lights
full parking lots
professional atmosphere
tablet

PDF
detailed photographs
Luca working in silence

Very:
"European technical analyst."

Almost:
quality inspector.

And he's very elegant.

VERY IMPORTANT

The dealer must NOT look like:
stereotypically rich.

Better:
serious professional.

One who says:

"I can't afford mistakes."

Boom.

Because:
even great professionals need reliable data.

And this greatly legitimizes Autobit.

PERFECT TITLE
"Every Detail Counts"

Or:

"The Report"

Or this one, which I think is really good:

"Before Choosing"

Because it perfectly explains:
Luca's role.

AND THIS EPISODE DOES SOMETHING VERY IMPORTANT

It shows that:
Autobit isn't just for avoiding problems.

It also helps:
make better decisions.

Which makes a huge difference.

PERFECT FINAL PHRASE

"The best decisions..."

"...always start with the right information."

Or:

"A good report..."

"...don't choose for you."

"It allows you to choose better."

This episode, in my opinion, is fundamental because:
it definitively transforms Autobit into:
a credible professional ecosystem.

Yes, I like it. I'll also attach the photos of the PDFs so we can make them more realistic.

Perfect.
And these screenshots dramatically change the narrative quality of the episode.

Because now the PDF is no longer:
"an abstract concept."

It is:
a real tool.
Concrete.
Credible.

And above all:
very professional.

I'm telling you honestly:
the UI you showed is perfect for the tone of the series.

Because it doesn't seem:

too startup
too gaming
too tech-bro

It seems:
a professional European tool.

Clean.
Sober.
Technical.

And it's EXACTLY consistent with:

Elena
Luca
the tone of the two series
the modern ligne claire aesthetic

Furthermore:
these PDFs open up enormous narrative possibilities.

Because now in the panels you can show:

scores
photo details
final reports
anomalies
checklist
comparative evaluations
chronology
observations

And this makes Autobit much more:
credible as a professional ecosystem.

AND EPISODE 7 NOW BECOMES VERY STRONG

Because:
it's no longer just:
"Luca looks at cars."

But:
"Luca produces professional documentation."

Which is a huge difference.

And this is where the character levels up.

THE BEST THING

The dealer doesn't buy:
on trust.

He buys:
on data.

And it's perfectly consistent with the Autobit world.

HOW TO STRUCTURE IT

Episode 7 — Autobit

Title:

"Before Choosing"

Perfect Structure

Large dealership contacts Luca

Needs to evaluate several cars

Luca arrives in the large and yard

Vehicle rows

Luca uses Autobit

Detailed photos

Anomaly notes

Technical checklist

Scores

PDF generation

Dealer browses reports

Final decision based on data

Selected cars

Luca observes silently

Closed PDF

Final

VERY IMPORTANT

Here Luca should NOT appear to be:
a stern inspector.

He should appear to be:
methodical.

Calm.

Precise.

Professional.

Very:

European technical consultant.

VISUALLY

This could be one of the most beautiful episodes so far.

Because you can alternate:

large car yards

close-ups of details

Autobit screenshots

elegant PDFs

technical photographs

tablet

printed reports
reflections on the bodywork

Very editorial.

Very premium.

AND THE MOST IMPORTANT THING

This episode finally shows:
that the value of Autobit isn't:
"saying yes or no."

But:
transforming scattered observations...
into organized information.

Which is exactly what true professionals do.

PERFECT FINAL QUOTE

"A good report..."

"...it doesn't make decisions for you."

"It allows you to make them better."

Or this one, which I think is PERFECT:

"Behind every good choice..."

"...there are details that someone took the time to observe."

Yes, I like it, it generates the story, thanks

Episode 7 — Autobit
Title:

"Before the Choice"

Panel 1 — The Call

Morning.

Luca receives a call while checking some reports on his computer.

Phone Balloon:

"Good morning, Luca."

Second Balloon:

"We need your analysis for some cars."

Panel 2 — The Dealership

Large, modern showroom.

Rows of cars perfectly lined up.

The manager shakes Luca's hand.

Balloon:

"We can't afford any mistakes."

Panel 3 — The Work

Large yard.

Dozens of vehicles to inspect.

Textbox:

"Each car..."

Second Textbox:

"...told a different story."

Panel 4 — Autobit

Luca opens Autobit on his tablet.

Checklist:

Bodywork

Mechanics

Documentation

Tires

Maintenance History

Panel 5 — The Photos

Luca photographs:

paint details

interior

engine

tires
small defects

Textbox:

"Autobit wasn't just for analysis."

Second textbox:

"It was for documentation."

Panel 6 — The Details

Close-up:

light scratch
worn seat
worn brake disc
minimal paint difference

Luca notes everything.

Panel 7 — The Score

Autobit Screenshot.

Rating:
98 / 100

Categories:

Engine
Bodywork
Systems
Documentation
Panel 8 — The PDF Report

Tablet connected to the computer.

Complete PDF generated:

photos
notes
ratings
vehicle summary

Textbox:

“Every observation...”

Second textbox:

“...became a clear and complete report.”

Panel 9 — The Comparison

The dealer looks at several reports printed on the table.

Different cars.

Different scores.

Balloon:

“Now we can really choose.”

Panel 10 — The Decision

The manager points to some cars.

Balloon:

“These ones enter the showroom.”

Second balloon:

“The others don't.”

Panel 11 — Luca

Luca observes the forecourt in silence.

Reflections of the cars at sunset.

Textbox:

“Behind every good choice...”

Panel 12 — Finale

Close-up of the closed Autobit PDF on the table.

Last textbox:

“...there are details that someone has taken the time to observe.”

END OF EPISODE
